Cynosure Scientists Present at 2004 Laser Meeting On Treatments for Leg Veins and Skin

Chelmsford, MA, (April 6, 2004)—Cynosure, Inc., a leading developer and manufacturer of lasers and pulsed light sources, announced that two members of its scientific team presented at the American Society for Laser Medicine and Surgery (ASLMS) meeting, which was held March 31-April 4, in Dallas, TX. The company also announced that one of its newest products, the **V Star pulse dye laser with SixPulse™ Technology**, was the subject of two presentations and two panel sessions at the meeting. The new TriStar™, PhotoLight™ and Apogee® Elite systems were also included in the discussions.

Rafael Sierra, Ph.D., Cynosure Chief Technology Officer, appeared on the panel discussion entitled "Leg Vein: Bridging the Gap". Evan Sherr, Cynosure Director, Clinical Studies, was an invited panelist for the session, "Skin Rejuvenation: Bridging the Gap", which included the V Star and other products.

"We are pleased to have the opportunity for our scientists to discuss Cynosure's unique technologies, such as the V Star SixPulse, especially at a luminary-led meeting such as the ASLMS. We are focussed on developing the most clinically effective systems for all the key cosmetic applications," said Michael R. Davin, CEO & President.

The V Star also recently won the 2003 Editor's Choice Award for treatment of striae ("stretch marks").

For clinical information on Cynosure lasers and pulsed light sources, call Cynosure at 800-886-2966 and visit www.cynosurelaser.com.

About Cynosure

Cynosure develops, manufactures, and markets laser technology products at its Chelmsford, Massachusetts headquarters for worldwide distribution. The company's extensive product line includes the V Star™ pulse dye laser for vascular, birthmark and facial treatments, the Apogee® family of hair removal lasers, the Tri-Star™, Apogee® Elite™, Acclaim™ and SmartEpil™ multi-application cosmetic lasers, the PhotoLight™ pulsed light system, the

TriActive™ LaserDermologySM for cellulite treatment and therapeutic massage and the PhotoGenica® SV for surgical ENT applications.

In 2002, El. En., Italy's leading laser developer and manufacturer, acquired a majority position of Cynosure, Inc. The product mix of the two companies is highly complementary and will provide opportunities for growth through an increased mix of products and wider coverage of global markets. El. En. and Cynosure are working closely to optimize joint production processes, research and development efforts, and to exploit worldwide distribution channels.

Today, over 5000 of Cynosure and El.En. lasers and light-based systems are installed around the world and are used in treating a full range of conditions.

Cynosure has offices in the United Kingdom, France, Germany, Singapore and Japan, and has forged a strategic partnership with Suzhou Cynosure Medical Devices in Suzhou, Peoples Republic of China. Cynosure's global reach extends to more than 60 nations and has given the company worldwide recognition in physician practices.

Cynosure was founded in 1991 by Dr. Horace Furumoto, who also founded Candela.
