AAD Camp Discovery Featured by Cynosure, Inc. At Recent Meeting *Donations Made for Physicians Visiting Booth*

Chelmsford, MA (May 5, 2003)---Cynosure, Inc., a leading developer and manufacturer of cosmetic and medical lasers and pulsed light sources, reports that it recently made a group contribution, on the part of approximately 100 physicians, to the American Academy of Dermatology (AAD) Camp Discovery.

Previously, invitations had been sent to all dermatologists who registered for the annual meeting of the AAD. When attendees dropped off their invitations at the Cynosure booth at the meeting in San Francisco, the company agreed to make donations in their names to the AAD's Camp Discovery. Formed in 1993, Camp Discovery is for young people with serious skin conditions. Each year, the AAD sponsors a week of summer camping experience for these children.

"Helping Camp Discovery is a natural extension of this company and my life's work. My original work 20 years ago resulted in the development of the pulse dye laser, which is used for treating port wine stain birthmarks in children and infants. Any efforts to alleviate the pain caused by serious skin deformities, especially in children, we support wholeheartedly," commented Dr. Horace Furumoto, founder and CEO of Cynosure, Inc.

About Cynosure, Inc.

Cynosure develops, manufactures, and markets cosmetic and medical laser technology products at its Chelmsford, Massachusetts headquarters. The company's extensive product line includes the PhotoGenica® V family of lasers for vascular treatment and the Four-Minute LaserFACIAL™, the Accolade™ laser for tattoo/pigmented lesion removal, the CO3 laser for facial micro-resurfacing, the Apogee®, Acclaim™ and Smartepil™ II hair removal lasers, the PhotoLight™ pulsed light source for a variety of treatments, including the PhotoLightFACIAL™ and the Tri-Active™ LaserDermologySM for cellulite treatment and therapeutic massage.

Cynosure has offices in England, France, Germany, Singapore and Japan, and has forged a strategic partnership with Suzhou Cynosure Medical Devices in Suzhou, Peoples Republic of China. In 2002, El. En. and Cynosure Inc. announced a new partnership between their two companies. Cynosure's global reach extends to more than 60 nations and has given the company worldwide recognition in physician practices.
